SHORTENED STATUTORY PERIOD OF RESPONSE		MAIL DATE	DELIVERY MODE	
3 MONTHS		04/02/2007	PAPER	

**Please find below and/or attached an Office communication concerning this application or proceeding.**

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

## Office Action Summary

Application No.

10/788,710

Applicant(s)

CABRERA, GEORGE

Examiner

Jean B. Corrielus

Art Unit

2611

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 27 February 2004 and 06 February 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1, 8, 11-20 is/are rejected.
- 7) ☒ Claim(s) 2-7, 9, 10 is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 27 February 2004 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/08)  
Paper No(s)/Mail Date 2/27/04.
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_.

## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 1-20 are objected to because of the following informalities: claim 1, please expand the following acronyms "FM, RF". The same comment applies to any other claim reciting similar limitations. Claim 1, line 7, before "said, "a" should be deleted; line 9, before "remainder", "a" should be deleted; line 11, "a received" should be deleted; line before the last, "a composite" should be replaced by "said" so as to make use of the antecedent in line 2. Claim 2, "including" should be replaced by "further comprising" and "intermediate" should be replaced by "between". The same comment applies to claim 9. Claim 4, line 2, "a" should be inserted before "signal". Claim 5, line 3, "received " should be deleted and "IBOC" should be expanded. Claim 9, after "fractional", "portion." should be inserted. As per claim 15, see claim 1 and last line, "broadcast" should be "broadcasted". Claim 16, please expand the following acronyms "FM, RF". Lines 4 and 5, ""an" and "a" should be replaced by "said", respectively; line before the last, "a composite" should be replaced by "said" so as to make use of the antecedent in line 2. last line "broadcast" should be replaced by "broadcasted". Claim 17, "including" should be replaced by "further comprising". As per claims 18 and 20, see claim 17. Note that any claim whose base claim is objected is likewise objected.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 12 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12, "said" adjuster" lacks of proper antecedent basis. Such antecedent basis problem can be corrected by changing the dependency of claim 11 from "8" to "9".

Claim 15, "said" adjuster" lacks of proper antecedent basis. Such antecedent basis problem can be corrected by changing the dependency of claim 13 from "8" to "9".

### ***Drawings***

4. The drawings are objected to because please use "signal flow" at the input of each circuit component. Element 30 is referred to in the specification as a "splitter", however, it is noted that such a device is well known as a "combiner" or "summer". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency.

Art Unit: 2611

Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1, 8, 11, 13, 15-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hunsinger et al US patent No. 5,757,854 in view of applicant's admitted prior art fig. 1. Hunsinger teaches a method and apparatus fig. 16 comprising a splitter that receives a said analog FM signal 14 for splitting [the] said FM signal into a "first signal" considered as the claimed "fractional portion" and "second signal" considered as the claimed "remainder portion", see the output of the modulator of fig. 16; circuit 16 corresponding to the claimed "summer" for combining said "first signal" (fractional portion) with said digital signal 18 to provide a first combined signal (note that circuit 16 is known in the art to generate a combined signal see for instance US Application No. 6,898,249, element 24 and col. 6, lines 3-4); and a combiner 22 that combines said second signal and said combined signal to provide a composite RF

signal to be broadcasted. However, Hunsinger et al does not teach a main FM transmitter for amplifying said second signal (remainder portion) to provide an amplified FM signal; a digital transmitter for amplifying said first combined signal to provide an amplified combined signal. However, applicant admitted prior art clearly teach prior a signal is combined by combiner C, a main FM transmitter 10 is used to provide an amplified FM signal; a digital transmitter 12 is used to provide an amplified combined signal. Given that fact, it would have been obvious to one skill in the art to incorporate such a teaching in Hunsinger et al in order to increase the output power so as to overcome the combiner insertion loss. See applicant's description pages 1-3 relating to the admitted prior art fig. 1.

As per claim 8, the digital signal is an IBOC digital signal see, title and abstract.

As per claim 11, Hunsinger does not teach that the combiner is a coupler having a coupling coefficients on the order of about -3db to about -9db. Applicant's admitted prior art teaches a combiner C includes a coupler having a coupling coefficient on the order of 10dB. See applicant's description pages 1-3 relating to the admitted prior art fig. 1. Given that fact, it would have been obvious to one skill in the art to incorporate a coupler having a coupling coefficients in the order of about 3-db to about -9db in order to efficiently coupled the input signal to the antenna for proper signal transmission. In addition, it would have been obvious to use coupler with a coupling coefficient in the order of about -3db to about -9db in order to minimize signal loss resulting in a boost of the transmission signal energy.

As per claim 13, see claim 11.

As per claim 15, see claim 1.

As per claim 16, see claim 1.

As per claim 17, Hunsinger and applicant's admitted prior art does not explicitly teach the further step of adjusting the phase of the first signal (fractional signal) however, it is well known in the art to adjust phase of a signal prior to being combined with another signal. Given that it would have been obvious to one skilled in the art to adjust the phase of the first signal (fractional signal) so as to bring the first signal in phase alignment with second signal so as to ensure that they are properly combined.

As per claim 18, it would have been obvious to one skilled in the art to manually adjust the phase of the first signal (fractional signal) and the motivation to do so would have been the same as provided above with respect to claim 17.

As per claim 19, see claim 8.

As per claim 20, see claim 17.

7. Claims 2-7, 9 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 12 and 14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean B. Corrielus whose telephone number is 571-272-3020.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jay Patel can be reached on 571-272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
